

Application No. 09/996,315  
Resubmission of Amendment (dated July 13, 2004) dated August 6, 2004  
Reply to Notice of Non-Compliant Amendment of July 30, 2004

**Amendments to the Claims**

This listing of claims will replace all prior versions and listings of claims in this application:

**Listing of Claims**

1. (Currently Amended) A method of making an information-recording medium having an indelible watermark comprising the steps of:

providing a mark on a back surface of a stamper using diamond-scribing, wherein said back surface of said stamper is opposite to a front surface, said front surface comprising a pattern of pits and lands; and

forming a substantially transparent disc using said stamper, said disc having a first substantially planar surface and a second surface opposite to said first surface, wherein said forming comprises the steps of:

transferring both of said pattern of pits and lands from said front surface of said stamper to said second surface of said disc and said mark from said back surface of said stamper, as an indelible watermark, to said second surface of said disc in a high pressure molding process, wherein said indelible watermark is visible under normal light conditions.

2. (Canceled)

3. (Previously presented) The method of claim 1 wherein said molding process comprises injection molding.

4. (Previously presented) The method of claim 1 wherein said molding process comprises injection-compression molding.

5. (Previously presented) The method of claim 1 wherein said molding process comprises compression molding.

6. (Original) The method of claim 1 wherein said providing comprises laser-scribing.

7. (Original) The method of claim 1 wherein said providing comprises etching.

8. (Canceled)

9. (Original) The method of claim 1 wherein said providing comprises use of a mechanical tool.

10. (Original) The method of claim 1 further comprising sanding the back of the stamper after said providing.

11. (Original) The method of claim 1 wherein said providing comprises depositing said mark subsequent to sanding the back of said stamper.

12. (Withdrawn) An information-recording medium having an indelible watermark produced according to the method of claim 1.

13. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark is superimposed onto the pits and lands on the second surface of the disc.

14. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark is located in a region of the second surface of the disc that is free from pits and lands.

15. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark comprises lettering.

16. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark comprises a graphical image.

17. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark comprises a trademark.

18. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark is machine readable.

19. (Withdrawn) The information-recording medium according to claim 12 wherein said indelible watermark is visible under normal light conditions.

20. (Previously presented) The method of claim 1 wherein said transferring comprises transferring said mark subsequent to sanding the back of said stamper.

21. (Previously presented) The method of claim 1 wherein said transferring comprises transferring said mark to a region of said second surface of said disc that is free from said pattern of pits and lands.

22. (Previously presented) The method of claim 1 wherein said indelible watermark comprises lettering.

23. (Previously presented) The method of claim 1 wherein said indelible watermark comprises a graphical image.

24. (Previously presented) The method of claim 1 wherein said indelible watermark comprises a trademark.

25. (Previously presented) The method of claim 1 wherein said indelible watermark is machine readable.
